

Locating the Jabber Buddies List

When you use iChat, you need to view your active Buddies.

If you have clicked the red dot after a previous iChat session to clear some screen space, the next time you reopen iChat your Jabber Buddies list will not appear.

To make it reappear, with iChat open, select the Window menu and drop down to Jabber List.

TIP

To avoid a 'Where's Jabber?' moment, click the yellow dot instead. That will send the Jabber Buddy list to your Dock.

If you quit iChat with it minimized to the Dock, the Jabber Buddies list will reappear on your screen the next time you launch iChat.
